Automation Events

Visit the Events section of our website to see what special workshops, seminars and other events are being held at a Gexpro branch near you. Visit our Events page by clicking [here](#).

Greetings Wayne,

Introducing GE Fanuc's PACMotion

The new PACMotion controller is the latest addition to the innovative RX3i PACSystems family of programmable automation controllers (PACs). This versatile servo motion controller combines the benefits of a highly integrated motion and machine logic solution with the performance, flexibility and scalability required for advanced machine

automation. The open programming environment greatly simplifies synchronization of motion and machine logic events without sacrificing real-time performance required for high-speed motion applications.

Click [here](#) to learn more about PACMotion.

QuickPanel View & Control

Looking for a complete, secure and rugged Operator Interface? You found it with GE Fanuc's QuickPanel family. These Operator Interfaces will communicate with most PLC's and PAC's on the market today.

Click [here](#) to learn more about QuickPanel View.
