GE Fanuc Update

If you have not heard the news about GE Fanuc becoming **GE Intelligent Platforms**, then please take a moment to read the special letter to customers about the GE Fanuc Joint Venture at our home page, click [here](#).

Cimplicity 8.0 Workshops

GE Fanuc and Gepro have teamed-up to provide free Proficy HMI/SCADA - Cimplicity 8.0 workshops around the country. Click [here](#) to see the schedule and to register to attend.

Weidmuller Q-Specials

Weidmuller's 3rd Quarter Q-Specials are about to run out. See the flyer by visiting our home page by clicking [here](#). Place orders by September 30, 2009, to receive the special discounts. 4th Quarter Q-Specials to be announced soon.

September is Back to School - and not just for the kids

Gepro & GE Fanuc Hosting Cimplicity HMI 8.0 Workshops Around the Country During the Fall

GE Fanuc has announced their schedule of workshops being conducted in cities around the country from now until the end of the year.

Here's a unique opportunity to learn more about Cimplicity's value-added capabilities, which can help you adjust to today's tough economic climate by significantly improving your operations and decreasing your costs. Attend one of our FREE 2009 CIMPLICITY workshops!

The latest release of Proficy* HMI/SCADA CIMPLICITY, version 8.0, goes beyond the superior advanced control and visualization you've come to expect from CIMPLICITY. It's more powerful, more flexible and more feature-rich than ever before. And you'll learn all about the new features in this workshop!

To see the workshop schedule, read more about the workshops, and register to attend a workshop, please click [here](#).

Look to Gepro for All of Your Automation Needs

Gepro has increased inventory on GE Fanuc Products

Gepro is committed to being the best when it comes to servicing our Automation Solutions customers. That's why we have increased our inventory of GE Fanuc Intelligent Platforms products, even in this struggling economic environment. This further strengthens our capabilities to provide the best solution for your application on time and on budget. Gepro continues to have the most dedicated, experienced, nationwide team of Automation Solutions Specialists in the market today, and is our greatest asset. In addition to GE Fanuc hardware and software, our specialist team can also help you with industrial networking, wireless products, and much more. Contact your local Gepro Automation Solutions Specialists today for more information on how we can assist you with your next automation project.

New product Spotlight: T-Series Single-Phase Power

Supplies

Just Released from Weidmuller

The T-SERIES is a new generation of high performance DIN-rail mounted single-phase power supplies designed to work reliably even under demanding factory floor conditions. A high power reserve guarantees reliable start-up of loads with high inrush currents.

Excellent electrical specifications and high immunity against fluctuations on input voltage makes these compact modules the best choice to power sensitive loads in industrial process control systems, machine tools or other demanding industrial applications. The T-SERIES offers users easy installation with detachable screw terminal block and snap-on mounting on DIN-rails. All models offer a DC-OK signal and external shut down function. Redundant operation with true power sharing is available as an option.

Here are just some of the features in the new T-Series Power Supply family:

- Hazardous approvals for process automation applications
- Industrial grade design with rugged metal housing
- Autoselect input and variable output voltages
- Industrial temperature specs, -25degC to +70degC
- Indefinite short circuit, overvoltage & overtemperature protection
- Power OK signal
- Remote On/Off
- Shock & vibration proof
- Optional panel mounting
- Redundancy module

For additional information on the new T-Series power supplies, contact your local Gexpro Automation Solutions sales professional today.

Ask the Gexpro Automation Help Desk: What does the RX3i Reset Button do?

"Here is a trick question for the Help Desk - what does the Reset Button actually do on the RX3i CPU?" signed, Confused in Ohio.

Gexpro Automation Help Desk - Well that does appear to be a trick question - the obvious answer is to perform a Reset, but things are not always as they appear now are they? The answer is actually that the button currently does nothing. From the **PACSystems CPU Reference Manual (GFK-222M)** on Page 2-1 it states, "The RESET pushbutton

is provided to support future features and has no effect on CPU operation in the current version."

Have a question for the Gexpro Automation Help Desk? Send it to us, and we may use it in future newsletters. Simply email your questions to automation@gexpro.com.
